

Prescription Libations

Superior cocktails that you won't enjoy anywhere else!

The Rum Project

A spirit with a deep dark rooted history, Rum is produced on every continent in the world except Antarctica. Rum is a distillate of Sugarcane, either from the fresh juice, the “sugarcane honey” or molasses. Depending on the country and style, the end result can vary greatly. It’s time to put Rum back in the drivers seat, highlighting the different styles, and its versatility!
